HE Journal's Paintings have been criticised and thoroughly judged and the verdict is that they are the most decorative and attractive color work that has yet been produced in America, and should find a prominent place in every home. Remember the first, entitled "Constance," will be issued Feb. 28th. As we have no way of anticipating in advance an unknown demand, it would seem that the only way to make certain in getting this celebrated set of pictures would be to send in your order to-day to the home office, the local agent, your newsboy, or stand.
